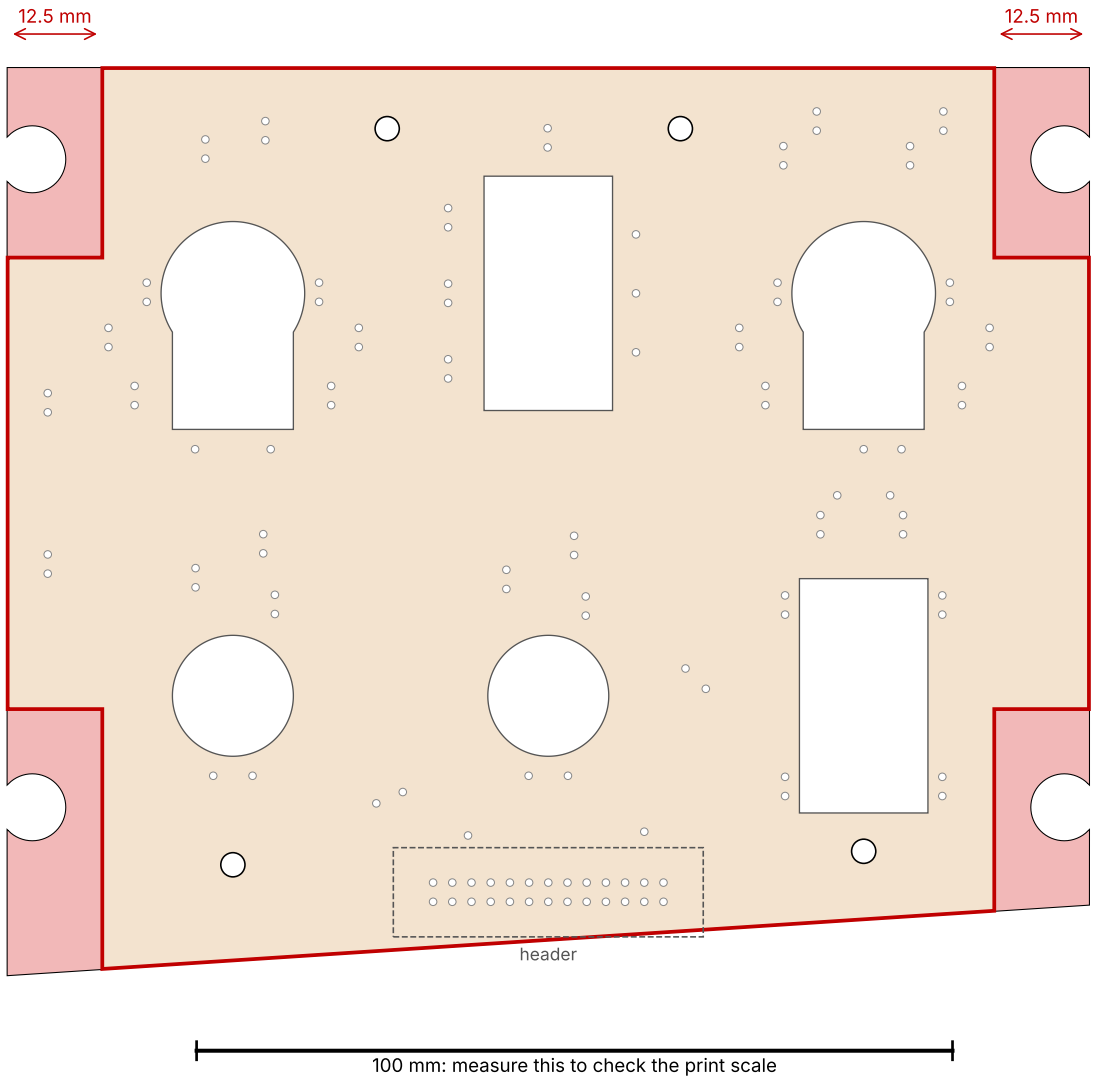
AUX LTS PCB v2: corner trim template (1:1, copper side up, header toward you)

Print at 100% / "Actual size", not "Fit to page". Cut off the hatched areas along the red line: 12.5 mm in from each side edge, from the corner to 13 mm past each corner fastener.
All four run out to the PCB edge: the top two are 25 mm long, the bottom two 35 mm (they reach the bottom and slanted edges).



Only ground copper is cut (checked against the milling file). Take the PCB off the base first. FR-4 dust: mask and vacuum, no blowing.
